Good day hiring manager,

I hope you're doing well! I'm an intermediate Software Developer with 3 years of experience building full-stack web solutions using JavaScript, Python, NodeJS, and React. I really enjoy creating tools that solve real-world problems and am always eager to learn and improve my skills.

Some highlights from my recent projects include building an open-source MySQL ORM for NodeJS called SQLifier, creating a custom video tutorial sharing site (4IR Tube), and developing LyfeResumes, a web-based CV builder using NodeJS/TypeScript and React. These experiences have helped me become confident working across the full stack and tackling challenges in web development, AI/ML, and ERP systems.

I'm comfortable working with a variety of databases like MongoDB, MySQL, and Firebase, and I also have experience with frameworks like React, NextJS, Django, and Springboot. Plus, I'm fluent in English and Pedi, which helps me connect with diverse teams.

I'd love to bring my skills and enthusiasm to opportunities you might have available and would appreciate the chance to discuss how I can contribute.

Thanks for your time and consideration!
